

Flectorgo 12.5 mg soft capsules
Flectorgo 25 mg soft capsules

Diclofenac epolamine

1. What Flectorgo is and what it is used for

Flectorgo contains the active substance diclofenac epolamine.

Flectorgo is a medicine belonging to a group of non-steroidal anti-inflammatory drugs (NSAIDs). This medicine is a pain reliever which can also reduce inflammation and swelling.

Flectorgo is used to provide short-term symptomatic relief in the following situations:
mild to moderate pain (such as headache, dental pain, period pain, rheumatic pain and muscular pain).

3. How to take Flectorgo

Swallow whole capsule with a drink of water.

To ensure the medicine works as well as possible, take the capsule on an empty stomach.

Adults and children aged 14 years and over:

It is important that you use the lowest dose that controls your pain and that you do not take Flectorgo for longer than necessary.

Always take this medicine exactly as described in this leaflet or as your doctor or pharmacist have told you. Check with your doctor or pharmacist if you are not sure.

For Flectorgo 12.5 mg

Initially take 1 or 2 soft capsules, then if needed 1 or 2 soft capsules every 4 – 6 hours. In any case, do not take more than 6 soft capsules (75 mg) in 24-hour period.

For Flectorgo 25 mg

Initially take 1 soft capsule, then if needed 1 soft capsule every 4 – 6 hours. In any case, do not take more than 3 soft capsules (75 mg) in 24-hour period.

Flectorgo should not be taken for more than 3 days. If symptoms persist or worsen consult your doctor.
